SUMMARY

Web developer residing in Dipolog City, Philippines with 10+ years of experience coding looking for remote work. Looking for a long-term company that I can hone and grow my skills with.

SKILLS

PHP, Laravel
Github, Plastic SCM
Agile/Scrum

Javascript, Vue.js, Inertia
REST/Web API
Unity, C#, Flutter

TailwindCSS, Bootstrap
MySQL
VB.Net, Wordpress

RECENT PROJECTS

Material Management Office Monitoring System

Laravel, Bootstrap

An ongoing project for the MMO office used for keeping track of inventory, purchase orders, and requisitions. I'm responsible for developing the entire system using Laravel and NiceAdmin(bootstrap template).

Portfolio

Vue.js, TailwindCSS

A personal web application showcasing my resume and portfolio using Vue.js and TailwindCSS.

Etecon App

Laravel, TailwindCSS

A web application made for a client mainly to generate hospice forms. The client can also make video courses with an exam after completion of a course.

Appointment Web Application

Laravel, Bootstrap

Web application made to manage Out Patient bookings. Hospital staff can create services with daily schedules. A client portal for patients is also available.

Kam-Inn Room Monitoring App

Laravel, Bootstrap

A simple web application used to monitor room rentals and inventory purchase. The application also emails the Inn owner for every transaction.

Notes App

Laravel, Vue.js, TailwindCSS

A CRUD web application made with Laravel, Vue.js and TailwindCSS.

WORK EXPERIENCE

Freelance Web/Software Developer

On my free time; I design and develop websites and applications primarily using Laravel for dynamic web applications, Wordpress for static websites.

Computer Maintenance Technologist I

Dr. Jose Rizal Memorial Hospital, 2019-present

Full stack developer working primarily in PHP/Laravel with MySQL as database. Developing web applications used primarily by employees of the hospital. Also responsible for maintaining computers, network management, and graphic design.

Software Developer/MIS Head

Dipolog Medical Center College Foundation, 2012-2019

Software developer in charge of creating and implementing various applications used by the school. Mainly worked with C# and MsSQL as database. I was also the MIS Head supervising our team of 3 software developers.

Information Technology Instructor

Dipolog Medical Center College Foundation, 2010-2012

After graduating, I was hired as an instructor teaching programming to college students. Languages I taught included C#, C, PHP, Assembly, MySQL, MsSQL, and VB.net.

EDUCATION

Bachelor of Science in Information Technology

Dipolog Medical Center College Foundation – 2006-2010
